

WHO ARE WE?

PerceiveMD is a multidisciplinary team-based, patient-focused center providing free, comprehensive assessments for medical cannabis and other breakthrough therapies.

We are revolutionizing modern medicine by creating the first of its kind, research-based, multidisciplinary center for medical cannabis and other forward-thinking therapies. We offer a holistic, team-based approach that focuses on you as the patient. Our team of nurses, pharmacists, physicians, specialists, and educators will all work together to ensure that you are properly assessed, informed and prescribed if appropriate. We will monitor your progress and potential side effects throughout your wellness journey. Your care doesn't simply stop with a prescription!

OUR VALUES

COMPASSIONATE CARE

We believe that each and every person should have access to medical cannabis - services recognized by MSP are offered free of cost and judgment.

HOLISTIC APPROACH

We believe that each patient is beautifully unique and complex, and our multidisciplinary team is dedicated to understanding and treating the patient as a whole.

PATIENT AUTONOMY

We believe in fostering a safe environment for patients to learn about their health and make informed decisions regarding their care.

GETTING STARTED

1) Booking an Appointment Most appointments are virtual although certain treatments will need to be performed in person. We recommend a video consultation so you can meet the PerceiveMD team face-to-face. Phone consultations are available to patients without access to the internet or a video device.

PerceiveMD provides a streamlined online booking service. Alternatively, you may reach us by phone at 1-844-935-2999. We're available to take calls and answer questions Monday to Friday 10am to 5pm PST.

2) Complete Intake Questionnaire Once you have booked an appointment, you will be prompted to complete the required pre-visit questionnaires. Those without access to a computer/internet can complete over the phone with a PerceiveMD team member. ***These questionnaires must be completed prior to your scheduled appointment.***

3) Obtain Physician Referral We can help you with this! Included in your intake questionnaire package (above) is a request for us to obtain a referral from a physician, usually your GP/Family Doctor. You may consider speaking with your doctor at your next visit with them. They can fax a completed referral form to 1-844-380-3980. Please contact the clinic if you do not have a family doctor and haven't seen a doctor for your primary concern.

4) Appointment confirmation A Patient Care Assistant will contact you to confirm your appointment.

WHAT TO EXPECT AT YOUR APPOINTMENT

Pharmacist Assessment One of our Clinical Pharmacists will review the medications you are currently taking to ensure that there aren't any drug interactions. This is a 15 minute phone call that will be scheduled on a day prior to your consultation with the doctor. *Note that this appointment may not apply to all patients depending on whether you take any medications.*

Nurse Assessment The day of your scheduled appointment will begin with a conversation with one of our nurses. They will go over certain details of your intake questionnaire to ensure we understood your answers correctly, and to get a general sense of why you are seeking medical cannabis. They are also available to answer any general questions you will have. You can expect to spend 15-20 minutes with the nurse.

Physician Assessment Once you have finished speaking with our nurse, you can expect to spend about 15-20 minutes speaking with a PerceiveMD physician discussing your medical condition(s), reviewing your medical history, and answering any questions you may have about your health. During this assessment it will be determined whether you are a candidate for medical cannabis. If cannabis treatment is deemed a good fit, you will receive the necessary authorization (e.g. medical document) to begin. A medical document will be completed, allowing you access to products directly from a Canadian Licensed Producer. A Cannabis Coach will then guide you through the process of choosing an appropriate product and LP, completing your registration, and ordering and dosing your product(s).
