

We Use Technology, Knowledge, and Passion to Empower Canadians with Disabilities

Our Story

Our organization was established when 21-year-old Neil Squire was left a brain-stem tetraplegic after a car crash. Seeing he was unable to speak or move his arms and legs, Neil's family and a group of professionals in Vancouver created a ground-breaking device allowing him to communicate by using his breath to type Morse code. After Neil passed, the small but mighty group formed the Neil Squire Society in his name to keep improving the lives of people with disabilities.

Our Work

We have been revolutionizing the lives of Canadians with disabilities since 1984 through accessible assistive technology. Our work enables people with disabilities to achieve their goals, reach their full potential and continue living life to the fullest.

We have experience working with people who have disabilities, injuries, and illnesses.

Areas of Focus

Innovation

We create affordable assistive technology devices that give people with disabilities greater control over their lives.

Digital Literacy

Through one-on-one computer tutoring, we help participants develop basic computer skills.

Employment

Our employment programs help our clients prepare for employment opportunities and develop their skills.

Assistive Technology

We provide ergonomic solutions and access to assistive technologies that remove barriers for people with disabilities.

Contact Us

We offer our programs at various partner locations throughout each province. Visit our website or contact us to find the location nearest you.
